

Trimble Scanning

3D LASER SCANNERS

INSTRUMENTS

X7

TX6

TX8

SX10

SOFTWARE

Trimble Perspective

Trimble RealWorks

Trimble Business Center

Many industries depend on 3D laser scanning to effectively complete projects quickly and accurately.

Each project requires the right tools—whether you're delivering a topographic survey, scan data of as-built conditions, performing comprehensive data analysis, or creating a renovation model based on an existing structure. Trimble® has developed the 3D scanning solutions you can trust to meet these challenges and quickly capture, analyze, model and produce precise deliverables.

Trimble Scanning 3D LASER SCANNERS

To help decide what 3D scanning solution is right for you, refer to the table below for a feature comparison between the X7, TX6, TX8, and SX10.

Compare				
Range	80 m	120 m	340 m	600 m
3D Point Acc @ 20 m	3.5 mm	3 mm	3 mm	2 mm
Leveling Accuracy	3"	1"	1"	0.5"
Typical Scan Duration	4 mns	3 mns	2 mns	6 mns
Imaging	3 x 10 MP, 1 mn	10 MP, 1 mn	10 MP, 1 mn	3 x 5 MP, 3 mns
Weight (incl. battery)	5.8 kg	11.2 kg	11.2 kg	7.8 kg
Calibration	Automatic calibration	Annual Service	Annual Service	Manual field calibration Bi-annual Service
Typical Workflow	Full in-field registration	Target-based or cloud-based registration	Target-based or cloud-based registration	Survey
Field Software	Trimble Perspective	Onboard Remote Control	Onboard Remote Control	Trimble Access
Standard Warranty	2 Years	1 Year	1 Year	2 Years

* Refer to datasheet and FAQs for full details and limitations.
